## History

The group formed in 2006 in Hong Kong. In the last third of 2007 we moved base to New York. Presently we're between New York and Providence.

We've shared the stage with Earthride, Solace, Cough, Elder, Black Pyramid, Pale Divine, Vorvados, Naam and many others.

**Queen Elephantine**, modal psychedelic doom, presents their third album: a long song in three parts, *Garland of Skulls*—kapālamālā. They have also released several EPs, including splits with Sons of Otis and Elder. Formed in Hong Kong in 2006 and migrated to USA, the band is currently based between NYC and RI. Looking for release, live, and press opportunities.

"To put this band into some sort of perspective, I would have to put them sort of what Pink Floyd or Hawkwind would be if they went metal while on serious rounds of downers while experimenting with some instruments from India... Forceful yet very melancholy, with this overall bleak feeling that nears the bottom of pure desperation in every word sung... Pretty heavy shit. 8/10" -Doom Mantia
